► ABOUT ME

Detail-oriented Full-Stack Developer with hands-on freelance experience building web applications. Currently focusing on specializing in Backend Development and deepening my expertise in Python. I am highly motivated to secure a Junior role within a professional development team, where I can contribute to backend scalability, solve complex problems, and accelerate my growth in the tech industry.

► WORK EXPERIENCE

Freelance Full-Stack Developer E-commerce Platform (Fashion & Apparel Retailer)

- Designed and developed a responsive e-commerce web application from scratch for a retail clothing store, enhancing the client's digital presence and sales channels.
- Architected the system using the MVC (Model-View-Controller) pattern to ensure a clean separation of concerns, improving code maintainability, readability, and scalability.
- Built a dynamic frontend using HTML5, CSS3, and JavaScript, ensuring an intuitive and seamless user experience.
- Developed a robust backend utilizing Python, managing data persistence and business logic efficiently with an SQLite3 database.
- Integrated the MercadoPago API to secure and streamline online transactions via credit cards and the platform's native app.
- Leveraged AI tools and Google Cloud infrastructure to optimize development workflows and implement smart features within the application.
